Name	Title
Laura Velazquez	Client Program Director – Engage
Lucy Thornton	Client Program Director - Interpreting – Engage
Megan Dixon	Quality Manager.
Spyros Spyrou	Translation & Review Tribe Leader
Sara Paoletto	Product Owner

Summary

Google has made changes to the LQE API, we currently retrieve audit data at the PLP level these new changes mean that we will be able to have access to the audit data at the document level and retrieve the draft audit data.

Business Benefit

This development will allow the TBW Google project management team to continue to have access to all relevant LQE data.

Importing of the draft audit data and final audit data.

We can now receive draft audit data before the final audit data once the draft audit data has been obtained the Job Details page will display the reported hours for the draft audit data on the reported hours' column, the LQE update received column and the LQE passed column will not update.

Previously we only had one field which showed Estimated Hours and changed to Reported Hours once audit data was received. Any job in the system that has been created before the deployment of this new feature will only display the Reported or Estimated Hours.

Draft audit received
